Thursday, January 31, 1957

Student Court and Traffic Violations

Crack down! That's the motto all traffic violators will run into around PUCC.

All students—full or part-time—day or evening—are expected to conform with all the parking and traffic regulations noted in the student handbook.

Violators will be asked to pay \$1.00 for the first offense, \$3.00 for the second violation, and \$5.00 for the third and following offenses.

These fines will be paid to the school cashier and the money will be placed in the Calumet Center Scholarship fund.

A Student court, however, is now in operation for those who have received traffic tickets and wish to appeal.

This court, composed of six members selected by the student council, includes Kenneth Blank, Charlene Chasteler, Joe Stodola, Andrew Zoldos, Steve Zlatarich, and Bernie Wontorek.

At the next meeting, with the help of Dr. Russell Bowser and Dr. Henry Sharp, faculty advisors, a supreme judge will be selected from the six members.

The meeting will probably decide on a rotation system among the members for the offices of clerk and attorney, thereby giving appealers more chance for unbiased work.

The court will meet at noon and at 6 p.m. on a rotating cycle for those desiring appeals.

The specific days on which the court will convene will be kept posted.

Panel Discusses Employment Problems

A panel discussion of what industries are looking for in the way of trained and educated college people was held on January 9 at the Calumet Center. Mr. Marshall Tackett, our registrar, arranged the meeting, which brought forth a number of worthwhile points.

Mr. F. A. McNeal, of the Hammond IBM office, emphasized his firm's need for trained service personnel. About 350 qualified men each year are needed for the Chicago area alone. Mr. McNeal interviews about 500 men a year. He finds that, among those who have two years of technical training beyond high school, a little better than one in three have the qualifications he is looking for. In his talk, he stressed the demand for men who are willing to continue to learn—men with future potential; many good positions are available to such men.

Dr. Carl Elliott, Employee Relations Manager at East Chicago Socony Mobile Co., said current expansion in the oil industry is calling for technically trained men. There is a place for such people at all levels. Primarily, he says, industry looks for people with the right personal characteristics. It is assumed that the graduate of an engineering program probably brings sufficient skills to his starting job. Such people, in any case, he said, need additional technical training after joining the company. And here the personal characteristics come into play. Attitudes are important. Willingness to learn, to adapt, and to make the best of circumstances is needed. Many deficiencies are in such personal aspects of the employee. Dr. Elliott further commented that not all

(Continued on Page 2)

PUCC To Offer Economics By Television

Next semester, in cooperation with WTTW, Channel 11, Purdue Center will offer its first course by television. Titled "Basic Economics," the course will be presented from the WTTW studios on Monday evenings, 8 to 8:30, for 17 weeks beginning Feb. 4.

The series, to be taught by Prof. Merle Schmid, will deal with fundamental aspects of production and distribution and will emphasize the benefits which are derived from the free-enterprise system. Among the topics which Mr. Schmid will cover during the TV lectures are "Economics: What Is It?"; "Income, Production, Employment, and Prices"; "Money and Banking"; "Demand, Supply, and Price"; "Profits"; "Monetary Policy and Economic Stabilization."

"Basic Economics" may be taken as a home-study certificate course. Students who register for the certificate course will be given a syllabus covering each of the lessons.

Or, for students who wish to study the subject in more detail, the course may be taken for three semester hours of credit as "Economics 210, Principles of Economics." These students, in addition to watching the TV lectures, will meet at Purdue Center every Thursday evening during the Spring Semester.

The instructor—for the course, Prof. Schmid, was graduated from the University of Washington in 1935. He holds a master's degree from the University of Arizona and is currently a candidate for the Ph.D. in Industrial Engineering at the Illinois Institute of Technology.

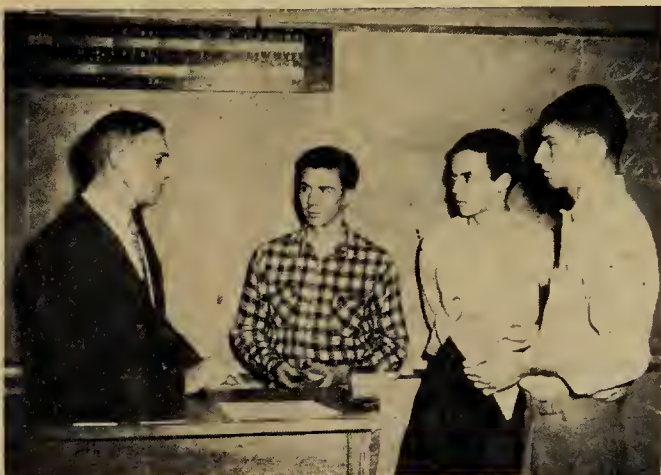

Mr. Schmid has done industrial consulting and has written numerous articles and pamphlets on basic economics and industrial engineering. At the Center, he is assistant professor of Industrial Management.

Library Receives Gift Volume

Mrs. Williamson, our librarian, has received a book of poems as the gift to the Calumet Center Library of Terry B. Dinkel. The book, Eventide, is a collection of Mrs. Dinkel's own poems, many of which have appeared in various magazines. Mrs. Dinkel is the great aunt of our editor. She learned of our library by reading the article about Mrs. Williamson in an earlier issue of the Boilermaker, which was sent to her. She lives in Cincinnati, Ohio. Mrs. Williamson has expressed her thanks in behalf of the library.

Charles Lannin, Margaret Smith, Jeanette Kometz, Andrew Unetich.

Professor Spalding speaking to Roger Ricketts, Jim Hoffman, and Bob Stryzinski.

The Student Council Speaks

Have you noticed the condition of the lounge lately? Shame on all of us! It's a real mess. That is why the student council is trying to work out a solution to the lounge problem. During the last meeting of the council, ideas were discussed for combating the problem. After a lengthy discussion a plan of cooperation was adopted. This plan calls for complete cooperation of each and every student and a willingness to do his part in trying to keep the lounge looking respectable. The Council is requesting that the students be responsible for the table at which they are seated and that they make sure that the table is clear of trash regardless of ownership of the material.

Holiday Spirit at Christmas Ball

Holiday spirit was prevalent at the Christmas Ball, our first social activity held in the new armory. The dance music was provided by Mickey Isley and his ten-piece dance band who kept everyone dancing till their feet hurt.

Many former PUCC students were seen at the dance and were willing to give tips on campus life to present PUCC students.

Although rumors were heard of the many places to be attended after the ball, quite a few couples could be found at The Log in Dyer.

For weeks in advance, decoration committees planned and designed the festive ornamentation. The two nights, and the afternoon preceding the affair, were spent draping wires, decorating trees, hanging tinsel, stringing flood lights, and last, but not least, sweeping and mopping.

Thanks to the students who volunteered their services, the chapones, the faculty and Student Council advisors, and Coach Hayes for their unceasing effort.

Mr. Springer Will Assume New Duties

Mr. George Springer transferred from West Lafayette to take charge of the new Civil Technology Program and to assist in the Building Construction Program. This technology program will prepare men to do technical work in highway construction.

This program of study has been designed to prepare students to take employment in fields requiring the services of a land surveyor, highway, and railroad technician. Emphasis is placed upon courses such as surveying, structural drafting, as well as related courses in mathematics and physical sciences.

Mr. Springer has been on the staff at Purdue since last summer, working on the development of the Civil Technology Program. He has had a great deal of experience in civil engineering highway construction.

Pamphlets are in the office explaining thoroughly the program.

Editor's Notice

Effective next issue there will be a "Voice of the People" column. Express your views in writing, and if they are constructive, they will be published. Sorry, no anonymous letters will be accepted, but if you wish your name will not be printed. Address all letters to "The Editor," Calumet Boilermaker, and place them in box "H" in the Lounge. Remember, you don't have to be a reporter to write for The Boilermaker.

BENEFIT SHOW TO BE STAGED

Come one, come all to the PUCC Benefit Variety Show.

Talk about talent. "Man we got it." Producer-director James J. O'Connell informs me that not only do we have the best that PUCC has to offer, but also we have several acts from other places. Real imported talent, yet. But, no more will be said about that now. Just come see for yourself.

This event is to be held in the National Guard Armory on 173rd Street, Feb. 8th and 9th from 7:30 to 9:30. There will be a dance following each performance.

O'Connell is being backed by the Student Senate and assisted by Representatives Bob Foster and Rob Svetovich. The proceeds from the show will go to the baseball team to buy uniforms. Tickets will be on sale both here at school and at the door.

Spalding Speaks to Freshmen

By Jim Hoffman

On Wednesday January 9, Professor Albert Spalding, head of department of Freshman Engineering, spoke on "The New Curriculum, How It Affects You as a Student." The lecture was held in rooms 15 & 16 from 12:00 until 12:50 p.m. and was attended by many knowledge-seeking students, especially freshmen.

Professor Spalding said that enrollment in the School of Engineering is steadily increasing and that a revised program of study has been needed for some time due to the rapid advances in engineering. Various committees were selected to survey the branches of engineering and industry, and their interpretation of the needs of their individual fields was that there is a need to improve the quality of many courses.

The new math courses are designed to advance faster and further. The new science courses are designed with this same purpose in mind. In the new curriculum, English is also stressed since today's engineers are not just technical people, but also businessmen executives clearly in need of the art of being able to express their ideas either on paper or orally. This new program is one that is intended not to be obsolete in 10 or 15 years. Today's engineers are able to learn their manual skills on the job, so why should valuable school time be literally wasted when it might be put to more advantage on theory subjects? Thus, most shop courses have been eliminated.

Many entering freshmen are poorly prepared and, under the new program will take less advanced courses than properly prepared students even though additional semesters may be required.

Another entirely new concept has been introduced although it is not (Continued on Page 2)

Technical Institute Catalogs Arrive

The new Technical Institute Catalogs have arrived explaining the two-year curriculum in detail. Such fields as Civil, Chemical and Metallurgical, Drafting, and Mechanical Engineering are a few of the many courses offered.

The Specialized Programs in Industry, Aviation, and Practical Nursing are outlined to give information on the requirements, fees, grades and honors.

The purpose of these programs is to prepare individuals for various technical positions. The new 1957-58 catalogs are in the office for your benefit.

Around the World

AUSTRIA

By Geza Cseri

Osterreich is a federal republic in central Europe with nine provinces: Vorarlberg, Tyrol, Salzburg, Carinthia, Styria, Upper and Lower Austria, Burgenland, and Vienna. The provinces are largely self-governing and are represented in the upper chamber of the federal bi-cameral parliament.

The country has an area of about 32,000 square miles and a population of 7,000,000.

The country is mostly agricultural (dairy products), but cannot produce enough food to be self-sufficient because the Alps cover three quarters of the land. The highest summit is reached in the Hohe Tauern: 12,460 feet.

The most important rivers are the Danube, Inn, Enns, and Murz.

Austria has some mineral resources such as iron, manganese, copper, lead, zinc, petroleum, and some industries as metallurgy, machinery, chemicals, and textiles, but the biggest enterprise is the hotel business. Every year millions of people go to Austria to admire the magnificent scenery of the Alps in the Tyrol. The most visited spots are the regions around the lakes of Atter See, Traun See, and Bodensee. The cities that attract the tourists are Vienna (the capital), with a population of close to two million; Linz (185,000); Salzburg (100,000); Innsbruck; Graz; Klegentfurt; and Bregeus.

In history Austria has four distinctive meanings: (1) Austria proper, i.e., Upper and Lower Austria, including Vienna. This was ruled from 976 A.D. by the House of Babenberg and was acquired in 1251 A.D. by Ottocar II of Bohemia. In 1276 Ottocar had to cede Austria, along with Styria, Carinthia and Carniola, to Rudolph I of Hapsburg, in whose family it remained until 1918. (2) With the rise of Hapsburg greatness, the term "Austria" came to designate the house of Hapsburg, which ruled the Holy Roman Empire from 1438 to 1806. The chief historic importance of Austria in that period was as bulwark against Turkish onslaughts (after that Hungary was defeated), which culminated and ended with the siege of Vienna in 1683. With the Thirty Year's War, Austria lost its primacy and, as a result, she tried to concentrate, especially under Maria Theresa and Joseph II, on internal consolidation of the hereditary lands. (3) Shortly before the dissolution of the Holy Roman Empire, Francis II assumed the title Francis I, emperor of Austria. This Austrian Empire consisted after 1815 of Austria, Bohemia, Moravia, South Poland, Lombardy, Venetia, Carniola, Istria, Dolomites and the separate kingdom of Hungary. The Hungarian revolution began the downfall of Austria in world affairs. In the Italian War of 1859, Austria lost Lombardy; the Austro-Prussian War, 1866, cost it Venetia. In 1867, Austria was forced to reorganize the empire and, as a result, the Austro-Hungarian Monarchy was created. (4) With the end of World War I, the Austro-Hungarian Monarchy collapsed and German-Austria was

Nursing News

By Donna Kissee

Congratulations to Miss Mary Maginsky, R.N. Miss Maginsky was made a member of the State Board of Nurses Registration and Nursing Education. She received her proclamation from Governor Craig. Miss Maginsky attended the first board meeting of the year on January 21 and 22 at Indianapolis.

On January 15, the alumni had a dinner honoring the fifth graduating class. Mrs. Bryant, president of the alumni, made place cards resembling the Purdue nurses' caps, and each graduate was presented with her first red band. The guest speaker, Miss Shrylock, talked about social security and taxes. The hostesses were Miss White, and Miss Algiers. The committee for revising the by-laws was Mrs. Turner, Miss Fetch and Miss Blackmun. Cake and coffee were served to the 43 nurses attending the meeting.

On January 20, 23 Student Practical Nurses received their diplomas from Purdue University. Now there are 135 graduates. A large crowd attended the graduation and listened to an address by Mr. Senour, Superintendent of East Chicago Schools. Miss Shirley Blackwell, a student in the seventh class, sang two beautiful solos. Miss Maginsky, Mrs. Clayton, and Mrs. Sabol were proud and happy as they thought of the many graduates and the many more to come. A graduate of the first class, Mrs. Willie Fields, was proud to see her daughter, Mrs. Ivy Jean Douglas, graduate. The minister present at the ceremony said, "These nurses have faith in God, faith in themselves, and faith in what they do."

The eighth class of students began its studies January 7. We are sorry there are only 16 students in the class. Due to the bus strike many potential students could not register. The girls in the present class are studying hard and have already spent a month here at PUCC. Meanwhile the members of the 6th class are training at their last two hospitals, and the 7th class members are at their first hospitals. They are all becoming good nurses and are proud to say they will be graduates of Purdue.

proclaimed a republic. In 1934 an authoritarian regime was established under Dolfuss. In 1938 the country came under Germany, and in 1945 under four-power occupation, which lasted until 1955 when the peace treaty was signed.

Panel Discusses

(Continued from Page One) men should be technically trained, as they may be better fitted for other work; he also observed that some run-of-the-mill engineers might have made excellent technicians after one of the two-year training programs. He stressed the importance of guidance early in the scholastic career of the student, to reduce the great amount of lost effort put out by those who don't quite fit in the position for which they are training.

Faculty Committees Have Many Duties

The Faculty of Purdue University Calumet Center acts as the legislative body of the Calumet Center in matters pertaining to internal government. A number of standing committees have been constituted by the Faculty. Through these committees jurisdiction is exercised over many aspects of the academic program, scholastic requirements, student affairs (including discipline), athletics, extra-curricular activities, faculty organizations, and special projects.

The Advisory Committee serves in an advisory capacity to the Center Director, Mr. Gyte, and acts as an executive group for the faculty in matters that require attention between general faculty meetings. The Advisory Committee has several sub-committees: Dr. Wilson is chairman of the Cafeteria and Student Lounge Committee; Dr. Cone, of the Orientation and Registration Committee, and Mr. Hays, of the Memorial Funds Committee. There are also three special, temporary committees whose duties are to arrange for an open house program for the new Armory (Mr. Richard Hayes, chairman), a regional science fair to be held in April or May of next year (Mr. Schlosser and Mr. Flannery, co-chairmen), and a student court (Dr. Kir-Stimon, chairman).

The Scholarship Committee serves to coordinate the work of the student academic advisors. It also aids in conducting registrations, encourages scholarship, and devises ways and means of recognizing scholastic achievements. The committee also works with the Committee on Scholarships at the Lafayette campus and makes recommendations concerning the selection of scholarship students. Mr. Stock is chairman.

The Student Affairs Committee exercises supervision over student affairs such as the Student Council, student publications (principally the Boilermaker), Circle K, assemblies and lectures, athletics, and discipline. The Committee also endeavors to promote continued good will among student groups and between student groups and the Faculty. Mrs. Cone is chairman.

The Alumni Committee, of which Mr. Relich is chairman, fosters cooperation among all alumni groups, including Purdue alumni organizations in the Calumet area, and the Division of Technical Institutes alumni. This committee seeks to maintain active organizations in each of the above groups.

The Library Committee is charged with the development and maintenance of up-to-date and adequate library facilities, including visual aids and equipment. Mrs. Gemberling is chairman. Mrs. Williamson, our librarian, meets regularly with the committee as an honorary member.

The Faculty Affairs Committee attends to general faculty welfare services, including matters relating to births, deaths, illnesses, marriages, and retirements within the families of faculty members. Sub-committees of the Faculty Affairs Committee are the Social Functions Committee, which handles picnics and other social events of the faculty, and the Square-Dance Committee. Mr. Zacher is chairman of the Faculty Affairs Committee.

Mr. Lewis A. Bain, superintendent of engineering training of Illinois Bell Telephone Co. in this area, was in substantial agreement with the other two panel members. In addition, he stated that employers want people who have four things: technical ability, responsibility, the habit of thinking reflectively, and aggressiveness.

In the following general discussion among panelists and those attending (the group included more than fifty school superintendents, principals, and guidance workers), there was further emphasis on the idea that schools should try to foster in their students a potential for continuing development and a desire to keep on developing. Too

BOOKSTORE BLUES

Here we are in the PUCC bookstore where students, teachers, and other harried personnel are violently clamoring to purchase the various articles so desperately needed for next semester. Along one wall, students are pawing through new textbooks trying to see whether last semester's answers are still valid; along another wall new students are desperately trying on T-shirts and sweat shirts to advertise the fact that they are slaves of our noble institution. The second semester freshmen are standing in one corner gawking in utter amazement that so many wriggling bodies can occupy a space not much larger than a doghouse (quite an engineering feat). Over by the cash register some POOR student is down on his knees pleading with the clerk, "Oh, please ma'am! I am in debt fifty dollars already. Please, don't take two dollars off the return fee just because I put my name in the book!" The clerk says, "You have my humblest apologies, but I am a representative of Southworth's, and, as you should already know Southworth's has a complete monopoly; so accept twenty-five cents for this book or nothing."

Some students are taking advantage of the situation though. While the clerk's back is turned, they are quickly emptying the often-filled candy dish (compliments of Mrs. Schmid). All in all, if anyone is able to leave after completing anything he intended to do, he has a power greater than Satan himself.

For those who haven't heard and/or find themselves without a key some cold Sunday afternoon: the Keeper of the Keys is Mr. Frank Hays. He was appointed Building Custodian several weeks ago.

Spalding Speaks

(Continued from Page 1) strictly adhered to here at the Center. That is the principle of assigning lighter loads with the hope that students will spend more outside time on their studies. From 14 to 16 hours are recommended, and better grades than ever are expected. The faculty feels that the student has to learn by himself so it is relying greatly on the lecture system, with little or no recitation.

Professor Spalding stated the belief that there is no shortage of mediocre engineers, just good ones, so there have been revisions in the standards for graduation. In his discussions with freshmen on campus he found that most students don't understand the learning process and they don't really desire to be scholars. Twenty percent of incoming freshmen can be considered illiterate, but it is not their fault; it is the fault of the whole system. Incoming freshmen are incapable of self-evaluation.

These students do not know how to solve their difficulties. They must ask themselves three questions: (1) What do I want to do? (2) What am I capable of doing? (3) How am I doing? Any student can learn if he wants to badly enough. Sometimes he should pause and reflect: where am I going and what am I doing? To be a good engineer, the student must fulfill several qualifications.

He must be interested. He must know what engineering is all about. He must know what it takes to be a good engineer. He must be able to answer the question, "Will I be happy?" with an affirmative reply.

Remember, failures are a matter of adjustment.

Spring Semester at

Purdue Calumet Center Begins

January 31, 1957

A late Orientation Exam will be held at 8:30 a. m. on

February 9, 1957

in Room 111, for those who failed to take the examination on January 19.

Registration for the Spring Semester will be continued for two weeks until

February 13, 1957

Any late comers may register through that date.

The summer school schedule is in the process of being developed. It would be well for you to make your summer school needs known to your advisor immediately if you would like to earn extra credits this summer.

Request admission information and schedules by calling

Purdue Office—TI 4-0520

Delcy Magioudis

One of the very attractive young ladies presently enrolled at PUCC is Miss Delcy Magioudis. Delcy, who lives in Gary, is a graduate of Wm. A. Wert High School in Miller. She is majoring in chemistry and intends to be editor of a science journal, although she would also like to be a laboratory technician. Miss Magioudis wants to learn a foreign language so that she may increase her knowledge by working in foreign countries. She likes working in industry and spends part of her summer vacation working in the analytical laboratory of General American. The rest of her vacation is spent traveling through the country collecting souvenir plates from places she visits. Her collection presently contains plates from all states except the Far West. Her plate collecting began when she purchased a souvenir plate at an FHA convention in Kansas City.

An avid sports fan, Miss Magioudis also takes part in activities such as swimming, water skiing, snow skiing, and ice skating. Another of her many interests is listening to music, preferably classical and semi-classical. Depending on her mood she sometimes likes light and happy music and at other times prefers deep music such as Wagner's (pronounced Vagner.) She also listens to "pops"; she says Elvis has a good voice and will settle down after he has had his fling.

DOCTOR FAYLE

A newcomer at PUCC is Dr. Harlan D. Fayle, who is presently teaching inorganic and qualitative chemistry courses. Dr. Fayle says he likes freshman chemistry best, especially since he had charge of Frosh chemistry at Duluth where he last taught. Doctor Fayle received all his degrees from the U. of Minnesota. He believes that freshman difficulties in chemistry are a matter of adjustment. Dr. Fayle lives in Munster, is married, and has one twelve-year-old son. He likes to garden and to play golf, occasionally breaking 100. He also likes fishing for pike and bass and playing ping pong with his family. Dr. Fayle belongs to the ACS (American Chemical Society), AAAS (American Association for the Advancement of Science), and the AAUP (American Association of University Professors). He can always be found smoking his very aromatic, well-aged pipe.

Mrs. Williamson complains that her library is not being used. Not even after the special feature the *Boilermaker* ran in its last issue. A start in the right direction would be to go to the library and look up the word in Webster's New International Dictionary. The first letter is 'L.'

PHILLIP SZPIECH

Phillip Szpiech, one of the key figures here at PUCC, lives in Black Oak and attended Calumet Township High School. There he was president of Chemistry Club, representative on the Student Council, secretary of Varsity Club, editor of the Annual, member of Senior Planning Committee and Junior-Senior Honor Society. During high school, Phil worked in a drug store his last two years and majored in college prep. He received three letters in track and graduated twelfth out of one hundred-sixty students.

In the community Phil is active also. He is President of the Black Oak Junior Community Club. In September of 1955, he joined the Naval Reserve, and is a seaman apprentice and wants to be a hospital man.

Now Phil is here at PUCC and is engaged in many organizations including Pre-Pharmacy in which he is majoring. Not only is he a representative on the Student Council, but he is also active as Business Manager on the newspaper.

Phil likes clothes, dancing, reading, hunting, and fishing, and says he will do anything for a laugh. The five-foot, eight-inch, brown-haired, blue-eyed boy also likes to play cards.

Phil's pet peeve is accepting glory but not working for it.

Olar Smith (in the country for the first time) "Oh, mamma, look at the cute little green snake."

Mamma (Likewise): "Put it down; it might be just as dangerous as a ripe one."

Beef 'n' Corn

P.U.C.C. Gains First Victory, 73-63

By Ken Ashley
Wednesday night, January 9, our hoopsters won their first game of the season after five consecutive losses. We played Inland Steel in our first game in the Armory. Inland, with some deadly outside shooting, gave our boys a rough time for a while, but our superior height and speed soon won out. The second half was played almost entirely by our second and third stringers, who did a very fine job. High scoring honors for the game went to Schuster of Inland, who hit for 20. Purdue scoring was led by Ken Ashley with 17, Chuck Lannin with 14, and the two guards, Chuck Jonas and Bob Stryzinski, with 10 apiece.

Box Score:

P.U.C.C. Grabs Second Victory, 76-56

By Ken Ashley
Friday night, Jan. 11, P.U.C.C. won its second game of the season, and has now won two for two in the Armory. The Cook County Hospital-Team, with a couple of 6'6" giants controlling the boards, put up a stiff battle, but a combination of superior speed and some sharp shooting by Clyde Rector in the first half and by Chuck Jonas and Chuck Lannin in the second half put our boys in the winner's circle. As in the Inland game, four of our boys again hit double figures.
